25X1

1. As part of the Russian televisior production program (production of television receiver sets), SAG Marten received an order, in January or February of 1952, for the production of 40 tons of aluminum-plated iron during 1952. This iron is called B 2.(1)
2. The Walzwerk fuer Buntmetall, Hettstedt, will only do the plating with aluminum. For the production of the special kind of iron needed for B 2, new installations will be constructed. It has been decided that they will be built in either Leuna, Buna or Bitterfeld, but it has not yet been decided in which of these works.
